You are advised to first review CPT for F-1 Students information at the International Center web site.

There are two types of Curriculum Practical Training (CPT). Some academic programs have an internship requirement while some offer an optional course for a non-required internship. List A below shows the academic programs that have an official internship/practicum requirement. List B contains the programs that have an optional CPT course offered to facilitate participation in an internship/practicum. Students with an optional internship are required to enroll for the CPT course to comply with CPT requirements. Students are advised to consult with their respective schools/departments regarding specific requirements for courses and internships.

### List A: Required Internships
